**Certified Pool/Spa Operators (CPO®) Training Course**

This 2-day training course is the only nationally recognized program for the Commercial Pool/Spa Operator. Since 1972, the National Swimming Pool Foundation (NSPF) has offered more training than any other pool and spa operator program. NSPF certifies those who pass the course as Certified Pool/Spa Operators (CPO®) and gives them a permanent registration number.

The CPO® seal of approval is assurance to pool and spa owners that their pool operators and maintenance staff are trained in the most advanced techniques in safety, water chemistry, maintenance and management. The course is conducted by lecturers experienced in the operation, management and design of public pool facilities.

After completion of the course, a final examination will be given on the materials presented in the CPO® Course. Each participant must pass the exam to become a Certified Pool/Spa Operator (CPO®). The text for the course is the Certified Pool/Spa Operators Handbook, an invaluable resource and reference guide for the professional who must troubleshoot on a broad spectrum of functional problems. All topics in the Certified Pool/Spa Operators Handbook are written by experts with long experience in their areas of specialization.
